

# Waidr Battery-powered Industrial Vacuum Cleaner

## Technical Parameter

Model	WD-1570	WD-3070
Voltage (V)	48V	
Power (W)	700	
Airflow (m3/h)	234	
Vacuum (mbar)	240	
Noise level (dB)	65	
Filter area (cm2)	8520	
Barrel capacity (L)	15	30
Battery type	Lead-acid	
Inlet (mm)	36	
Filter type	HEPA + Non-woven filter	
Machine weight (kg)	40	45
Machine size (mm)	500*400*860	500*400*1060

## Features

1. Equipped with 48V DC motor, for dry and wet dual use, with compact structure and portable.
2. 700W large suction, suitable for many working environments needs.
3. One-click to start the motor.
4. By side rolling over the dust collecting bucket, it is fast and convenient to dump waste. (WD-3070)
5. 33AH battery capacity. It can last 90 minutes after being fully charged.
6. The machine is made of stainless steel and equipped with heavy duty polyurethane brake caster.
7. Equipped with HEPA polyester filter and non-woven filter, which can be washed and reused.
8. Suitable for general cleaning working time needs, fully charging time 6-8 hours.

## Working Environment

◇ Working area: Places where power is not convenient such as commercial street, property cleaning, parking garage, warehouse, food factory, square, playground, conference room, hospital, hotel, corridor, etc.

◇ Suitable for vacuuming : Dust particles, metal scraps, metal slag, metal particles, sand, stone, etc.

		
Filter bag	36mm hose	Brush for floor and carpet
		
HEPA filter	Flat nozzle	Small dust brush
		
Wet brush	Stainless extension tube	Round brush

## APPLICATION
